## 100 YRS OF ELECTRIFICATION & COMMEMORATIVE **EVENTS HELD BY SOUTHERN RAILWAY**

Chennai 05, February 2025: 100 Years of Electric Railways in India: A Milestone for Indian Railways Rail enthusiasts often remember September 1825 as the month when the first-ever train operated in the world, while April 16, 1853, is etched in Indian electrification were a country worldwide to Railway history as the barrier, but the operate electric day the first train ran in benefits—particularly railways and the third in India. However, for suburban commuter Asia. February 3, 1925, traffic—soon became marked another evident. The milestone - the first technology was electric-powered train particularly suited for journey in India, from routes with heavy Chhatrapati Shivaji traffic and steep Maharaj Terminus gradients, making it (CSMT) to Kurla in ideal for the urban areas marks the 100th Mumbai. anniversary of electric traction in India, the country is also on the brink of achieving 100% electrification of its broad gauge century, Mumbai's of the few Meter Gauge suburban networks, achievement, just as population needed a monumental as the first solution for its rail operation in India, increasing commuter signifies a century of traffic. Steam progress in railway locomotives struggled electrification.

The Road to Electrification: A Century-Long Journey

train only in 1925.

Electric traction quickly demonstrated clear advantages over

The Electrification of Mumbai: The First

to manage the steep inclines of routes towards Pune and Nashik, further emphasizing the need The introduction of for electrification. In Railways in India took 1904, W.H. White, the just 28 years after the Chief Engineer of the world's first train, but Bombay Presidency the adoption of electric government, proposed traction was a slower electrifying the two process. While the primary rail networks world witnessed its first serving the city: the electric passenger train Great Indian Peninsula in Germany in 1879, it Railway (GIP) and the took India 46 more Bombay Baroda and years to introduce this Central India Railway Calcutta (now Kolkata) technology. Werner von (BB&CI), now known began to take shape. electrification success Siemens is credited as the Central and After a 1954 report is unparalleled, with the with presenting the Western Railways. from a railway team country now home to world's first electric World War I delayed the studying European the world's most train in 1879, but India project, but by 1920, electrification models, electrified rail network. saw its first electric electrification plans for the 3000 V DC system. The only remaining the Bombay-was adopted for the non-electrified lines are Pune/Igatpuri/Vasai region. The first section some heritage and lines were approved.

The first electric steam engines, train in India ran on particularly in terms of February 3, 1925, using H o w r a h a n d traction in 2025, Indian power, acceleration, 1500 Volts (V) Direct Sheoraphuli in Railways is poised to and efficiency. Electric Current (DC) between locomotives required CSMT (then Victoria less maintenance, Terminus) and Kurla, a produced no pollution, distance of 16 developed a new and were capable of kilometers. This 25,000 V AC system, hauling longer, heavier marked the beginning which was initially met trains over steep of clean electric with resistance. inclines. The initial transport in India, and However, by 1959, high costs of India became the 24th

The Electrification of Southern India

Alongside Mumbai, the South Indian Railway (SIR) began electrifying its suburban network, with Mumbai. As 2025 of Bombay, now the Madras Beach (now traction accounted for line using the same freight traffic in Eastern 1500 V DC system. and South Eastern Electrification was Railway zones. In the early 20th this section remains one expanded rapidly in network. This rapidly growing lines ever electrified in notably in Howrah,

> By the time India gained independence in 1947, only about 388 kilometers of rail lines were electrified, primarily around Mumbai and Madras.

Electrification Takes Root in Eastern

While Mumbai led in Eastern India faced delays, partly due to the World Wars and the nearly 100%. Great Depression. It wasn't until the 1950s that electrification in of electrified track in mountain routes. As Eastern India was India celebrates the inaugurated between centenary of electric December 1957.

During the same period, France's SNCF

India trialed the system on the Rajkharsawan-Dangoaposi section, with remarkable success. By November 1957, Indian Railways decided to adopt the 25 kV AC system as the standard for electrification, making India only the second country after the Soviet Union to do so. With increase in traffic density, now Indian Railways is further advancing to use 2x25 kV AC traction for its

A New Era: Electrification Across

By 1966, electric Chennai) to Tambaram more than half of the completed by 1931, and Electrification also Sealdah, and Kharagpur divisions. The advantages of e l e c t r i c trains-reduced diesel dependency, improved efficiency, and a cleaner environment—fueled continued growth.

The electrification of Indian Railways accelerated in the following decades. the way, electrification From just 388kilometers in 1951, the network expanded disruptions of the rapidly to present day

> A Global Leader in Electrification

India's railway reach new heights in efficiency, sustainability, and connectivity, offering a cleaner and more reliable future for millions of passengers across c o u n t r y .

#### TATA MOTORS PARTNERS WITH GOVERNMENT **OF MAHARASHTRA TO RESTORE 1000 WATER BODIES IN OVER 20 DISTRICTS**

Chennai 05, February 2025: Reinforcing its commitment to safeguard water resources and uplift rural communities, Tata Motors today signed a Memorandum of Understanding (MoU) with Government of Maharashtra to restore 1000 water bodies in over 20 districts in the water-stressed regions of the state.

In 2024, Tata Motors rejuvenated and restored 356 water bodies in Maharashtra by leveraging the Gal Mukt Dharan Gal Yukt Shivar Yojana, a community-based desiltation programme, in partnership with the Soil and Water Conservation Department of Government of Maharashtra, NAAM Foundation, and local communities.

Strengthening its collaboration, Tata Motors intends to scale the water conservation initiative to over 20 districts in the state, including the water deprived regions of Vidarbha and Marathwada. The proposed collaboration aims to rejuvenate and revive 1000 water bodies in Amravati, Latur, Chandrapur, Nagpur, Nanded, Parbhani, Akola, Gadchiroli, Yavatmal, Dharashiv, Chhatrapati Sambhaji Nagar, Ahilya Nagar, Sangli,

Solapur, Pune, Palghar, initiative, Priya Khan. Thane & Decial Duty for the programme.

Kulkarni, Head of Corporate Social Responsibility at Tata Motors says, "We are immensely proud to have strengthened our partnership with the Government of Maharashtra and NAAM Foundation to address the impact of droughts and water scarcity in the state. The successful rejuvenation and restoration of 356 water bodies in 2024 has encouraged us to scale up the programme to over 20 districts and CEO - NAAM reach many more Foundation, adds, "The villages in NAAM Foundation Maharashtra. This began addressing programme strives to Maharashtra's raise the water table, acute water shortage in provide access to potable water, make irrigation water available throughout

districts of the state. - Chief Minister's NAAM Foundation Office, Government of will be the Maharashtra states, implementation partner "The Government of Maharashtra launched the 'Gal Mukt Dharan, Commenting on the Gal Mukt Shivar initiative, Vinod Yojana' to increase water capacity of existing dams and water bodies. This programme has evolved into a people's movement thanks to the invaluable support of our partner organisations like Tata Motors and NAAM Foundation. Together, we are not just restoring

water bodies; we are

sustainability to reduce

the impact of recurring

droughts in the state."

2015. Our partnership with Tata Motors and the Government of Maharashtra is a significant milestone towards these efforts. Speaking on the Last year we

collectively expanded our work to ten districts. We are happy to see that the positive impact of the water conservation efforts will now reach more districts."

In 2024, Tata Motors and NAAM Foundation successfully rejuvenated and revived 356 water bodies, excavating ~ 60 lakh cubic meters of silt across 10 districts of Pune, Palghar, Thane, Satara, Dhule, Solapur, Chandrapur, Ahmednagar, Beed and Latur. This collaborative effort has created a capacity of approximately 7000 million litres of water, benefitting 7,000 farmers and significantly raised the water table and improved access to potable water in rural Maharashtra.

Gal Mukt Dharan fostering resilience and Gal Yukt Shivar Yojana provides preapproved funds to the farmer for the silt transportation to their farms, which enhances fertility of the soil. The end-to-end digital monitoring mechanism ensures agility and transparency in project implementation.

> The success and impact of the rejuvenation of water bodies in Maharashtra is a testament of Tata Motors' commitment to s u s t a i n a b l e development and

#### YAMAHA R15 CROSSES 1-MILLION-MARK PRODUCTION **MILESTONE: A LEGACY OF PERFORMANCE** AND INNOVATION IN INDIAN MOTORCYCLING

February 2025: India Yamaha Motor (IYM) Pvt Ltd. is proud to celebrate a major milestone for one of its most iconic motorcycles—the Yamaha R15 - which has completed the production milestone of 1 million units. A product that has led Yamaha's performance strategy in the Indian market since its debut, the R15 has been at the forefront of delivering cutting-edge technology and style, while appealing to the aspirations of young Indian motorcyclists through its confidenceinspiring handling prowess and exceptional riding experience.

Chennai 05,

With the production of over 1 million units of R15 at the state-ofthe-art Surajpur plant, this milestone underscores Yamaha's manufacturing excellence and commitment to global quality standards in meeting India's growing demand for premium motorcycles while also supporting global markets. Reflecting the rising preference for premium motorcycles, IYM prioritised Indian customers, with more than 90% of these units sold in India. The R15 with cutting-edge
